

Summerschool & Workshop 2003: “Solar Magnetic Phenomena”

From August 25, 2003 to September 5, 2003 a Summerschool & Workshop about “Solar Magnetic Phenomena” will take place at the Kanzelhöhe Solar Observatory, Austria. The Summerschool & Workshop are mainly aimed at graduate and post-graduate students working on their master or doctoral thesis, and at young researchers who recently have finished their PHD in solar physics.

There will be six themes, with 5 or 6 lectures on each given by the following invited speakers:

- J.C. Brown, University of Glasgow, UK
- High energy radiation from the Sun
- C. Denker, BBSO, USA
- Observations of the chromosphere and the photosphere
- B. Fleck, ESA, NASA/GSFC, USA
- Solar physics from space
- P. Heinzel, Ondrejov Observatory, CZ
- Solar prominences
- L. van Driel-Gesztelyi, KU Leuven, B
- Magnetic helicity and CMEs
- B. Vršnak, University of Zagreb, HR
- Solar flares - observations & theory

You are invited within the Workshop to give oral presentations in the whole area covered by the scientific topic. All invited lectures as well as the Workshop contributions will be published in a special conference volume by Kluwer Academic Publishers.

A limited amount of funds is available to assist the participation of (young) researchers. Deadline for registration is June 16, 2003. For registration and further information please visit our Web site:
